ABOUT THE COURSE

Supply chain and logistics management have been among the fastest evolving business disciplines over the past two decades. The logistics and transport sector in Guyana is severely underdeveloped and major improvements will be necessary to enhance its overall economic competitiveness in the coming years.

In this introductory Logistics and Supply Chain course, learners will learn about the three major components of the logistics and supply chain network: transportation, warehousing, and inventory.

WHY CHOOSE THIS COURSE?

- Recognize trends and modern practices in supply chain and logistics management
- Practice forecasting and inventory optimization techniques
- Appraise item categories and formulate appropriate sourcing strategies
- Appreciate the role of transportation management in logistics
- Use value adding warehousing techniques

COST

\$36,000.00

WHAT WILL I LEARN?

- Modern Supply Chain and Logistics Trends
- Forecasting and materials planning
- Procurement and go-to-market Strategies
- Role of Transportation and Shipping in Logistics
- Role of Warehousing in Logistics
- Reverse logistics
- Sustainable operations
